

M 4 VIGITHERME

SPECIFICATIONS

The M 4 Vigitherme is made up of a stainless steel case and a nylon body carrying the connecting screw terminals. The parts under tension are insulated from the ground of the apparatus. The bi-metallic disc is located at the bottom of the stainless steel case which then constitutes the portion sensitive to temperature.

A M 4 B version that does not return to initial state by cooling is also available. To reactivate it, it is necessary to press the red button located in the middle.

Temperature range :	0°C to +110°C
Current rating :	10 A
Voltage rating :	250 V
Types of contacts :	opening - closing - inverter
Composition of contacts :	solid silver
Voltage proof between terminations and ground :	4 000 V
Contact resistance :	6 m Ohm
Connection :	screw terminals
Maximum operating temperature	+ 120°C
Attachment :	by 2 or 4 3mm screws

ACCESSORIES

P 4 SMALL PROTECTIVE PLATE

As an option a small black bakelite protective plate can equip the M4 Vigitherme. It is attached by 2 3mm screws and nuts. It enables the reactivation button to be pressed without touching the connection under tension (here with M 4 B).
