FASTENERS FOR USE WITH PC BOARDS

No matter how sophisticated or advanced, electronic components must be attached reliably and securely if they are to deliver optimum performance. We offer several fastener products for use with PC boards to satisfy component-to-board, board-to-board, and board-to-chassis attachment needs.

Concerns about potential damage to PC boards due to improper secondary installation operations have prompted our latest innovative solution, **ReelFast® surface mount fasteners**. These fasteners mount on PC boards in the same manner and at the same time as other surface mount components prior to the automated reflow solder process. The fasteners simply become another board component. The fasteners are provided on tape and reel compatible with existing SMT automated installation equipment. The benefits of using ReelFast® SMT fasteners are: faster assembly; reduced scrap; reduced handling; and reduced risk of board damage that may occur when fasteners are improperly installed with off-line equipment.

Broaching fasteners can also offer practical alternatives to "loose" hardware. They install permanently in all types of PC boards, as well as aluminum, acrylic, casting and polycarbonate components. A broaching fastener is a knurled-shank fastening device that can be pressed into a hole to provide a strong threaded or unthreaded attachment point in non-metal materials. Specially formed axial grooves around the shank of the fastener "broach" or cut into the material, creating a firm, interference-type fit resistant to rotation. **Broach/flare-mount standoffs** (Type KFB3) offer greater pullout performance.

QUICK REFERENCE CHART

PEM Fastener Type	Page No.	Mounting Types				Primary Use							
		Broach Mount	Broach/ Flare Mount	Surface Mount	Clinch/ Broach Mount	Nut	Spacer/ Standoff	Snap Attachment	Stud	Captive Screw	Color Coding	Right Angle Attachment	Sheet Joining
SMTSO Nut/Spacer/Standoff	4			•		•	•

PFK Captive Screw	10	•								•			
SMTRA Right Angle	11			•								•	
SFK Sheet Joining	12	•			•								•

Broaching and broach/flare types are designed for unplated thru-hole applications. If used in plated thru-hole applications, the stresses involved can damage the plating, push out the plating entirely, or break any traces inside the board that might be connected to the plated hole. Increasing the mounting hole size +.005" to +.008" /+0.13 to +0.2 may relieve these conditions. In non-plated thru-holes this will also help when delamination, measeling or crazing is evident after installation. When none of the above can be tolerated, we recommend type SMTSO (solder-mount) type fasteners.

General recommendations for "Keep Out" areas are the same as our "Min. Distance Hole C/L to Edge" dimensions stated in the dimensional charts of our bulletin.

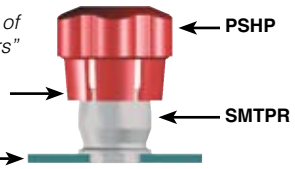
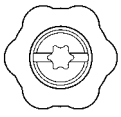
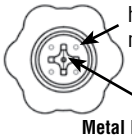
When Assembled

Spring action of plastic "fingers" holds screw in retracted position.





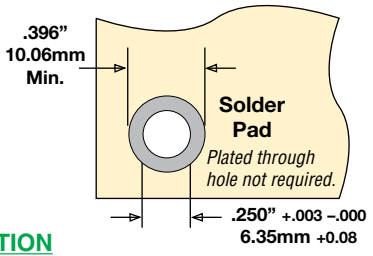
Available with six-lobe recess on special order.



Four dimples on head designate metric thread.

Metal Phillips Recess
#4-40 & M3 = #1
#6-32 & M3.5 = #2

Stencil Masking Examples



COLOR CAPABILITIES FOR TYPE PSHP SCREW

The colors shown here (codes #002 thru #007) are non-stocked standards and available on special order. Since actual cap colors may vary slightly from those shown here, we recommend that you request samples for color verification. If you require a custom color or you need a "color matched" cap, please contact us.

Std. Black #001 Red #002 Orange #003 Yellow #004

Green #005 Blue #006 Violet #007

Non-flammable UL 94-V0 plastic caps are available on special order.

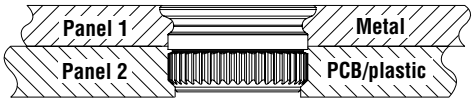
(1) Fastener will provide flush application at minimum sheet thickness.

Can be used as a single flush-mounted pivot point. For more information, please contact our Applications Engineering Department.



Type SFK joining metal to PCB/plastic.

(1) For plated studs, Class 2A/6g, the maximum major and pitch diameter, after plating, may equal basic sizes and can be gauged to Class 3A/6h, per ASME B1.1 (see notes at end of table C-1) and ASME B1.13M, Section 8, Paragraph 8.2.

(2) See PEM Technical Support section of our web site for related plating standards and specifications.

(3) HRB - Hardness Rockwell "B" Scale. HB - Hardness Brinell.

(4) Optimal solderability life noted on packaging.

For Types KF2, KFS2, KFE, KFSE, and PFK

1. Prepare properly sized mounting hole in board.
2. Place fastener into the anvil hole and place the mounting hole over the shank of the fastener as shown in drawing.
3. With punch and anvil surfaces parallel, apply squeezing force until shoulder contacts the board.

Part Number	D +.003" −.000"	G Min.
PFK-440-40	.173"	.250"
PFK-440-62	.173"	.375"

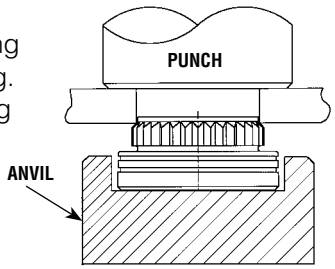
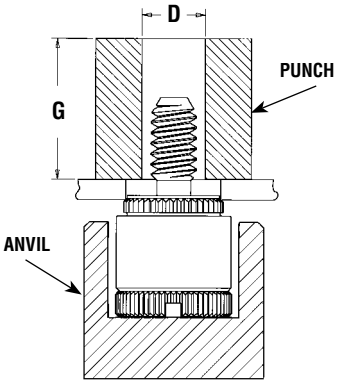
PFK-632-40	.190"	.250"
PFK-632-62	.190"	.375"
PFK-632-84	.190"	.500"

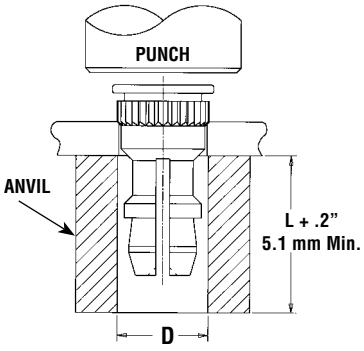
Part Number	D +0.08mm	G Min.
PFK-M3-40	4.5mm	6.4mm
PFK-M3-62	4.5mm	9.5mm
PFK-M3-84	4.5mm	12.7mm



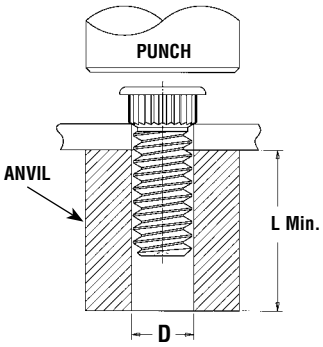
Types KF2, KFS2, KFE, KFSE



Type PFK



Type KSSB



Type KFH

For Types KSSB and KFH

1. Prepare properly sized mounting hole in board.
2. Place fastener into mounting hole as shown in drawing.
3. With punch and anvil surfaces parallel, apply squeezing force until head contacts the board.

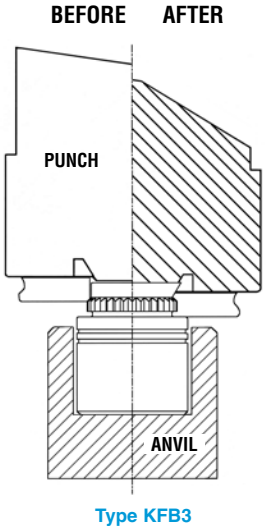
Part Number	D +.003" −.000"
KFH-440-L	.113"
KFH-632-L	.140"
KFH-832-L	.166"
KFH-032-L	.191"
KSSB-156-L	.216"

Part Number	D +0.08mm
KFH-M3-L	3.1mm
KFH-M4-L	4.1mm
KFH-M5-L	5.1mm
KSSB-4mm-L	5.49mm

For Type KFB3(1)

1. Punch or drill properly sized round mounting hole in board.
2. Place fastener into the anvil hole and place the mounting hole over the shank of the fastener as shown in diagram to the left.
3. Using a punch flaring tool and a recessed anvil, apply squeezing force until the shoulder of the fastener contacts the board. As the fastener seats itself in the proper position, the punch tool will flare the extended portion of the shank outward to complete the installation. The combination of broaching and flaring provides high pushout performance.

(1) PennEngineering manufactures and stocks the installation tooling for the KFB3.



Type KFB3

Thread Code	Length Code	Anvil	Punch (Flaring Tool)
#4-40	-2	975201213300	975201231400

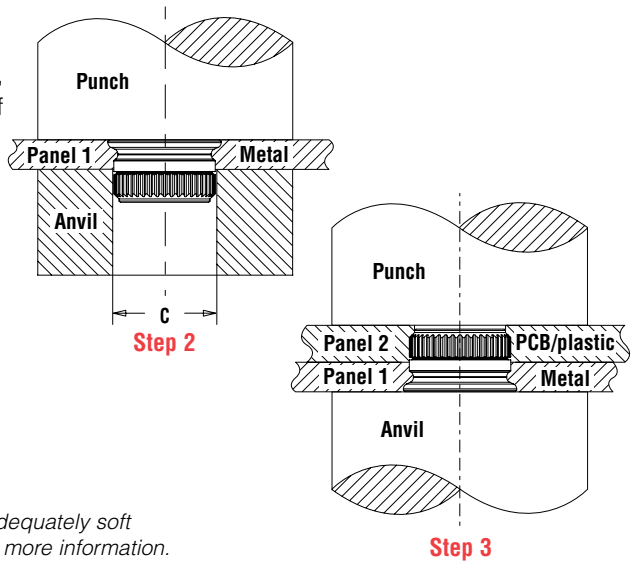
M4	-12 to -14	975201220300	
M4	-14 to -16	975201219300	

For Type SFK

Step 1. Prepare properly sized mounting hole in both panels.
Step 2. Using only Panel 1, with the punch and anvil surfaces parallel, apply squeezing force until the fastener is flush with the top of Panel 1.
Step 3. Place Panel 2 over fastener and apply squeezing force.



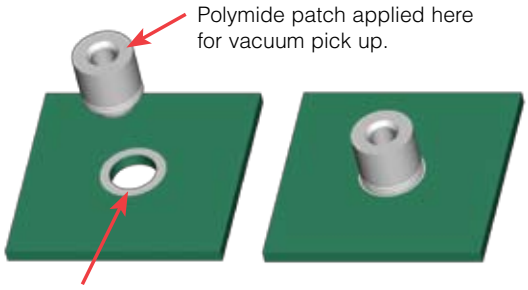
ANVIL DIMENSIONS

Size	C ±0.13/±.003 (mm) / (in.)	Punch Part No.	Anvil Part No.*
SFK-3	3.05 / .120	975200048	970200229300
SFK-5	5.05 / .199	975200048	970200020300

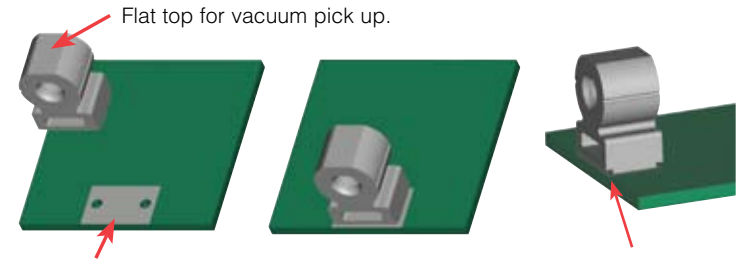
** Part number for anvil used in Step 2*

NOTE: *Fastener can be installed in both sheets at once when metal panel is adequately soft compared to the non-metal panel. E-mail techsupport@pemnet.com for more information.*

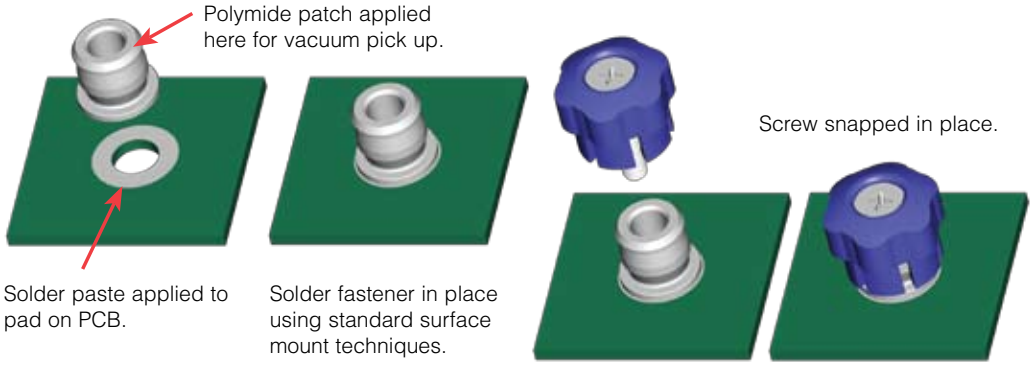
For SMT Nuts and Standoffs



For SMT R'ANGLE® Fasteners



For SMT Captive Panel Screws



PERFORMANCE DATA(1)

ReelFast® SMT product performance *is dependent upon application variables. We will be happy to provide samples for you to install. If required, we can also test your installed hardware and provide you with specific performance data.*

(1) The values reported are averages when all installation specifications and procedures are followed. Variations in mounting hole size, sheet material, and installation procedure will affect this data. Performance testing of this product in your application is recommended. We will be happy to provide samples for this purpose or perform the installation for you.

(2) These are typical values for parts installed in drilled mounting holes. Punched mounting holes yield values approximately 15% less.

(3) Not applicable.

(4) See Application Data drawing on page K-7.

(5) 1 Mil Cu, .5 Mil Sn/Pb plated thru-hole.

PEMSERTER® PRESSES

For best results we recommend using a PEMSERTER® press for installation of PEM broaching fasteners. For more information on our line of presses call 1-800-523-5321 or check our web site.

TYPE SFK SpotFast® CLINCH/BROACH MOUNT FASTENERS

Type and Size	Thickness Code	Installation into Panel 1 Cold-rolled Steel		Installation into Panel 2 FR-4 Fiberglass		Pushout of Panel 2 (2)	
		kN	lbs.	kN	lbs.	N	lbs.
SFK-3	0.8	6.2	1400	1.8	400	200	45
SFK-3	1.0	8	1800	1.8	400	200	45
SFK-3	1.2	8.9	2000	1.8	400	200	45
SFK-3	1.6	10.2	2300	1.8	400	200	45

SFK-5	1.0	13.5	3000	1.8	400	400	90
SFK-5	1.2	15.6	3500	1.8	400	400	90
SFK-5	1.6	17.8	4000	1.8	400	400	90

(1) The values reported are averages when all installation specifications and procedures are followed. Variations in mounting hole size, sheet material, and installation procedure will affect this data. Performance testing of this product in your application is recommended. We will be happy to provide samples for this purpose or perform the installation for you.

(2) In most applications, pullout strength of the SFK fastener in Panel 1 exceeds pushout strength of Panel 2.

OTHER FASTENERS FOR CONSIDERATION TO USE WITH PC BOARDS

TYPE PF11MW™ FLOATING CAPTIVE PANEL SCREWS
(See PEM® Bulletin PF)

Unique flare mount feature allow fasteners to “float” in mounting hole.

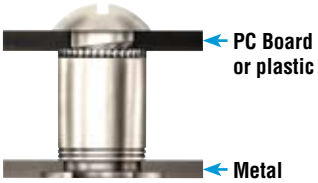
- Compensates for mating thread misalignment.
- Installs into any panel material.
- Appropriate for close center-line-to-edge applications.
- Color coded knobs available.

TYPE PF11MF™ FLARE-MOUNTED CAPTIVE PANEL SCREWS
(See PEM® Bulletin PF)

- Appropriate for close centerline-to-edge applications.
- Doesn’t require high installation force.
- Installs into any panel material.
- Installs flush on back side of panel.
- Color coded knobs available.

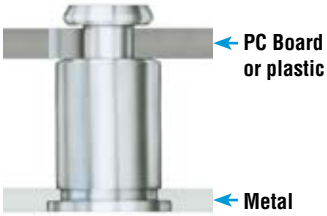
TYPE SOAG AND SOSG GROUNDING STANDOFFS
(See PEM® Bulletin SO)

- Designed for clinching into steel or aluminum chassis.
- “Gripping teeth” on opposite side of standoff firmly contact mating PC Board.



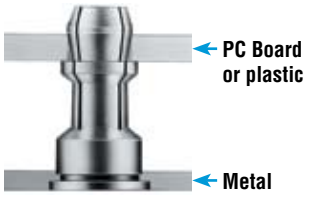
TYPE SKC KEYHOLE® STANDOFFS
(See PEM® Bulletin SK)

- Clinch feature mounts fastener permanently into metal sheet.
- Allows for quick attachement and detachment of PC Board.
- Head is flush or sub-flush in metal sheet.
- Makes horizontal or vertical component mounting possible.



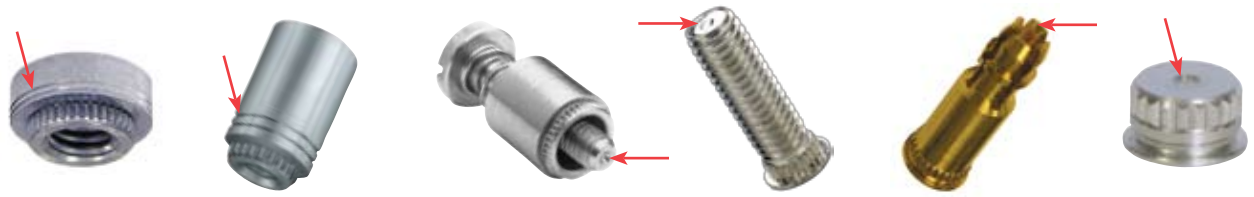
TYPE SSA, SSC, AND SSS SNAP-TOP® STANDOFFS
(See PEM® Bulletin SSA)

- Spring action holds PC Boards and subassemblies securely, while allowing for quick removal.
- Screws and other threaded hardware are eliminated.



PEM® TRADEMARKS

For more information on these and other PEM products, visit our PEMNET™ Resource Center at www.pemnet.com



To be sure that you are getting genuine PEM® brand fasteners, look for our "dimple", or "two groove" registered trademarks.

RoHS compliance information can be found on our website.

Specifications subject to change without notice.
Check our website for the most current version of this bulletin.
